### The Ethical Landscape of Commercial Space Activities

The ethical considerations surrounding commercial space activities are multifaceted and often interconnected They include

#### Environmental sustainability

The growing amount of space debris poses a significant threat to operational satellites and future space missions The UN Office for Outer Space Affairs UNOOSA estimates over 1 billion pieces of space debris orbiting Earth with only a fraction actively tracked This necessitates the development and implementation of sustainable practices including designing satellites for endoflife disposal and developing technologies for debris removal Failure to address this will result in a Kessler syndrome a cascade of collisions creating an unusable space environment

#### 2 Resource exploitation

The potential for asteroid mining and the extraction of resources from celestial bodies raises questions about ownership equitable access and the potential for environmental damage The 1967 Outer Space Treaty prohibits national appropriation of celestial bodies but its applicability to commercial activities remains unclear highlighting the need for a clearer legal framework Experts like Dr Frans von der Dunk a leading scholar in space law emphasize the importance of developing international agreements that ensure fair and sustainable resource utilization

#### Safety and risk

Space tourism and other commercial ventures inherently involve risks The lack of comprehensive safety regulations and liability frameworks raises concerns about the wellbeing of space tourists and the potential for accidents impacting Earth The Challenger and Columbia disasters serve as stark reminders of the inherent dangers and the need for rigorous safety protocols AI and robotics in space The increasing use of artificial intelligence and autonomous robots in space exploration raises ethical questions about accountability transparency and the potential for unintended consequences The development of ethical guidelines for AI in space is crucial to ensure responsible deployment and mitigate risks

### Policy and Governance Gaps

Current international space law primarily based on the 1967 Outer Space Treaty is struggling to keep pace with the rapid advancements in commercial space activities This treaty while crucial lacks specifics regarding commercial exploitation and liability in many areas This necessitates

#### Strengthening international cooperation

The development of international agreements and collaborations is crucial to establish common standards for safety sustainability and resource management in space UNOOSA plays a vital role in fostering such collaborations but greater commitment from national space agencies and private companies is essential

#### Developing comprehensive space traffic management systems

Effective tracking and management of space debris and active satellites are critical to prevent collisions and ensure the safe operation of space assets International cooperation is vital in developing and implementing such systems

#### Establishing clear liability frameworks

A welldefined liability framework is crucial to address accidents and damages associated with commercial space activities providing clarity for both private companies and governments

#### Promoting transparency and accountability

Increased transparency in space activities <sup>3</sup> including data sharing and open communication is crucial to build trust and ensure responsible behaviour

### Actionable Advice

#### Industry selfregulation

Commercial space
